IDC Forecasts Worldwide  
"Whole Cloud" Spending to  
Reach **\$1.3 Trillion** by **2025**

## Worldwide Whole Cloud Outlook

The focus will be on defining the types and scale of resources delivered, governing the movement, storage, and analysis of data, and establishing robust developer, security, and subject matter **ecosystems**.

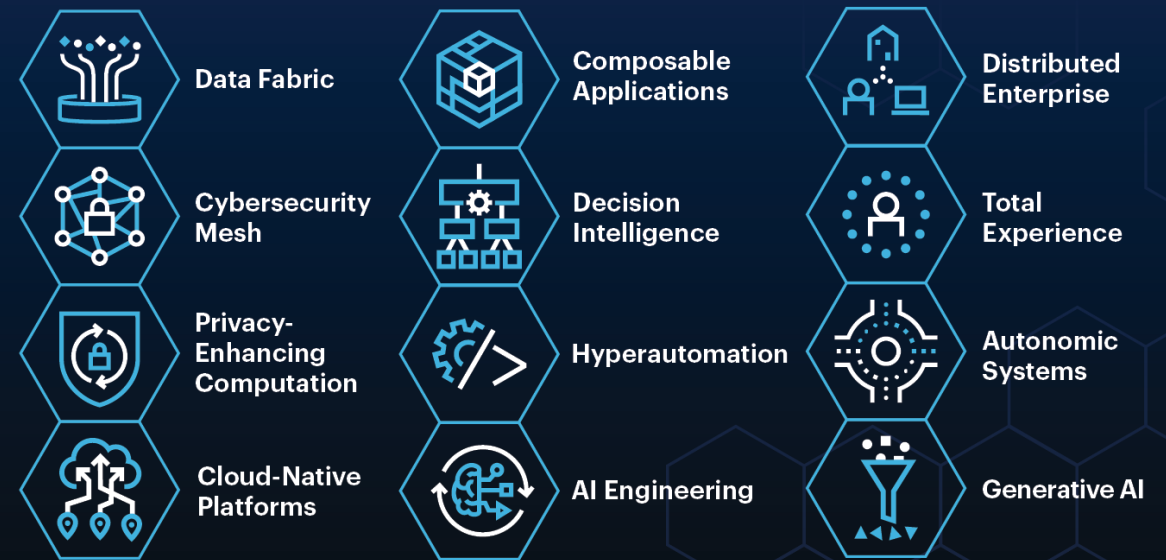

For cloud infrastructure providers, the **development and deployment of specialized capabilities across diverse** environments

# “Gartner Announced Top Strategic Technology Trends for 2022”

Cloud-native platforms are technologies that allow you to build new application architectures that are resilient, elastic and agile — enabling you to respond to rapid digital change.

Cloud-native platforms improve on the traditional lift-and-shift approach to cloud, which fails to take advantage of the benefits of cloud and adds complexity to maintenance.
